

**MONSOON KITCHENS** | This Massachusetts-based, family-owned company was started by two Indian entrepreneurs who combined their families' talents to create high-quality, all natural, ready-to-serve Indian food without trans fats. Unlike other prepared Indian meals, Monsoon's sauces and entrees "stand alone". This means end users don't need to add yogurt, paneer or other ingredients before serving them. All of Monsoon's frozen appetizers, sauces and entrees are based on recipes developed by Monsoon's founders, which have been refined from family and traditional Northern Indian sources.
