

# BERNARD RANCHES

**Riverside, CA**

Sustainably Grown, Unwaxed Citrus.

---

## About Bernard Ranches

Vince and Vicki Bernard began farming their Riverside County farm in 1984 and have been bringing their produce to market since the early 80's. They farm sustainably by relying on the use of beneficial insects, fertilizing with seaweed and using drip irrigation systems throughout the groves to conserve water. Mushroom compost is added to the seaweed-rich soil for an added hit of nitrogen compound - an element that fruit trees crave. The superior flavor and sweetness of Bernard Ranch citrus is the combined result of ultra-rich, seaweed-packed soil, ideal terroir and hands-on farming. Expect delicate, clean flavors in all they put forth. These people love what they do for a living.
