About Compart Family Farms

Premium quality Compart Duroc Pork is the result of a carefully managed pork breeding program. Compart Duroc hogs are bred, born and raised on small farms where family members are involved in the day-to-day management of their stock. The breeding program is the result of over 65 years of combining the very best purebred lines of the Duroc breed. Compart Family Farms have also conducted extensive research and development to create a proprietary Compart Duroc feeding program. This feeding program optimizes both the pig's performance and its meat quality. This, coupled with raising the pigs in comfortable, environmentally stable facilities, reduces stresses that adversely affect muscle quality.
