

# FIRST LIGHT FARMS

**Hastings, New Zealand**  
Beautiful Grass-Fed meats.

---

## About First Light

All our animals are 100% grass-fed on free-range pastures, as nature intended. The ingredients on the packet are fresh water, clean air, and sunshine. It is almost an unfair advantage having New Zealand as our farm, but the best grass in the world isn't enough to stake our claim to having the best grass-fed meat in the world. Everything we do is focused around producing meat that is tasty, tender and juicy every time. We cannot give you the formula, suffice to say it includes special genetics, New Zealand's best farmers, stress-free animals, and a supply chain managed by people who understand and value the perfect steak.
