

HAY! STRAWS

San Francisco, CA
Natural Drinking Straws

About Hay! Straws

Hay! Straws are made from natural plant stems and are 100% biodegradable, which means they won't linger in landfills, or pollute our land or oceans. They are similar in feel and function to the plastic straws we've all become accustomed to, but without the toxins and the damaging footprint on our earth. Unlike paper straws, HAY! Straws are made from a renewable source, they are Gluten-Free and best of all, they don't get soggy!
