## About Lucky's Real Tomatoes

New York's Chefs may remember Lucky walking into their kitchens with a case of tasty tomatoes over her shoulder, back in the early 1980's. Although it was Lucky's face they saw, it was her brother Alan Marcelli, who developed the farming division and closed loop trucking system that kept their valued chefs supplied year round with great tomatoes. So many of the family members who were the foundation of the company--- their Dad Tony, Mom Linda, and brother Marc all worked hard behind the scenes to make Lucky's Real Tomatoes the success it is today.
